

GOUTTIÈRE SOPRASOLAR

The **GOUTTIERES SOPRASOLAR** is a spare part of the **SOPRASOLAR PARK** system (tilted and rigid photovoltaic modules implemented on metallic structure).

User application

The **GOUTTIERES SOPRASOLAR** ensure the water recovery between photovoltaic modules and its deflection into the lateral grooves of the **RAILS SOPRASOLAR PARK**.

Composition

	GOUTTIERE SOPRASOLAR
Matter (EN 573-3)	Aluminum 6060T6
Length	960 mm
Width	79.1 mm
Height	62.4 mm
Mass	817 g

Characteristics

	GOUTTIERE SOPRASOLAR
Installation	1 GOUTTIERES SOPRASOLAR between every module of the same column
Type of photovoltaic modules	Aluminum framed
Color	Grey
External environment	All atmospheres except mix, aggressive or severe

Installation

GOUTTIERES SOPRASOLAR must be stored on a plan support, sheltered from bad weather and from high temperature variations.

The **GOUTTIERES SOPRASOLAR** are installed following the installation manual **SOPRASOLAR PARK** given by **Soprasolar**.

Special indications

Hygiene, health and environment :

The **GOUTTIERES SOPRASOLAR** are not composed of any dangerous component. They match the general requirement concerning hygiene, health and environment.
